

TWICE invites you to participate in “Amazing American States” May 22 – 25, 2017

Amazing American States Grades K-3

During this 45-minute connection, partner classes share a presentation about their chosen state (can be your state or any other state you'd like; partner classes must select different states). Following the presentations, students spend about 10-minutes asking each other questions about their respective states and communities. Students will research and share information about land forms, farming, their towns and cities, location in the United States and fun facts that make the state interesting!

Where is this Amazing American State? Grades 4-8

Your class will research a city and state of your choice (partner classes must select different states). You will need to find information based on required clues that will be given to you by TWICE (ex: region, history, civics, etc.). When connected with your partner class for this 60-minute connection, each classroom will give a presentation with the clues about your city and state. The students from the other class will attempt to discover the secret location using the Internet, maps, textbooks and other available resources. Be creative and have fun with this exciting program!

Who May Participate?

Amazing American States is open to K-3rd grade students.

Where is this Amazing American State? is open to 4th-8th grade students.

What's the Cost? Both amazing programs are **FREE** to TWICE members.

Important Timeline Dates:

- 🇺🇸 **April 28-May 8, 2017:** Registration for both programs. To register, please visit the TWICE website at www.twice.cc.
- 🇺🇸 **May 9, 2017:** You will receive an email with your partner teacher's information. You should contact your partner teacher immediately and stay in contact until your program date.
- 🇺🇸 **May 22-25, 2017:** Amazing American States (K-3) and Where is this Amazing American State? (4-8) connections will take place.
